Mr. George S. Laing,
Thermodynamics Building,
University of Toronto.

Dear Mr. Laing:

I have received your letter with the two journals but my time has been so completely occupied that I have not yet been able to read your articles.

I note what you say about the possibility of an opening under the Navy League. I think, however, that it would be only fair to Professor Argue to let him know early if you are likely to make a change, because as you realize it is extremely difficult now to get persons to fill positions in any department.

I am glad that you are able to get both remuneration and interest to yourself in writing such articles.

Yours sincerely,

President.

Laing, George S.
